

CANYON ROAD.

Canyon Road® Cabernet Sauvignon

Inspired by the winding roads of California's Wine Country, Canyon Road wines express true varietal character in the bottle. Our winemaking team uses grapes from some of California's most prestigious wine regions to bring to life the luscious fruit flavors of each unique variety. Canyon Road wines are made with food in mind. Soft and approachable, the subtle fruit flavors naturally complement a wide array of foods.

About the Wine

The Canyon Road Cabernet Sauvignon is a full-bodied, rich red wine grown in California. Aromas of fresh blackberry and black currant berries, complemented with cocoa and vanilla. In the mouth, juicy dark fruit with a velvety texture, finishing with hints of caramel.

Winemaking Notes

For this wine, the grapes were harvested at optimum ripeness and fermented warm (88-92°F) to create intense flavors, rich color and velvety tannins. Post fermentation, the wines were aged to add complexity and balance.
